Executive Summary: Rural Fiber-to-the-Home Project

Lynnville Telephone Company has been deploying FTTH since 2015 in order to achieve 100 percent fiber connectivity to all its customers. During 2020 this FTTH project will encompass 26 customer / locations at an estimated cost of \$299K.

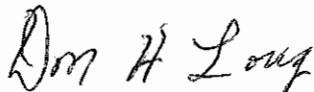

The grant funds will be used to provide 25/3 or better broadband service to these locations. With the completion of the 2020 FTTH project we believe we will be able to be 100 percent fiber connected by year-end 2021 for both our urban and rural customer locations!

Project Start Date for Construction: May 1, 2020

Project Completion Date: November 1, 2020

Thank you for your funding consideration.

Respectfully,

Don H. Long - President
