To Whom it May Concern:

I am writing to recommend the broadband services provided by Danville Mutual Telephone Company. I work on the IT team for a community health center. Danville currently serves one of our locations in Keokuk, IA with a second location to come in Burlington, IA. As a non-profit primary healthcare provider fast and reliable broadband is extremely important. The dual components of technology and broadband together are forging a powerful way to deliver better and less-costly healthcare.

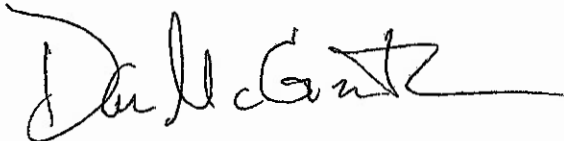

I began working with our business relationship with Danville in 2018. We have been highly satisfied with the quality of service and the personal customer service that we have received from Danville. The ordering, installation, and on-going service has been without hassle. In the arena of internet service providers, they are 1st rate.

I strongly recommend using Danville as a high speed broadband provider. Please feel free to contact me with any questions about my experience with Danville.

I am writing to express my own personal positive experience; the opinion expressed is not intended as coming from my employer.

Sincerely,

Dan McGrath
