A new public comment has been received on **331023**. The comment and contact information are listed below.

### Comment

Panora Telco currently offers broadband services of speeds greater than 25/3 in three of the census blocks included in Western Iowa Wireless' grant application delivered via a state-of-the-art fixed wireless network infrastructure. Please see the attached file for a list of census blocks included in Western Iowa Wireless' application that overlap where Panora Telco already provides service at speeds greater than 25/3. Please also refer to the attached customer bill as further evidence of Panora Telco's service provided to this area. Additionally, Panora Telco has included as an attachment a description of the fixed wireless technology used to serve the referenced areas. Panora Telco provides service in additional census blocks included in this application. While they do not currently offer speeds of 25/3 in those additional areas, Panora Telco has a history of upgrading services and has plans to upgrade additional census blocks included in Western Iowa Wireless' application in the coming year.
