In addition to any criminal penalties authorized by lowa Code section 720.2 that may result from any false statements of material fact made herein or any other remedies available at law, equity, or otherwise, if it is subsequently determined that I have made a statement, representation, warranty, certification, or attestation in this form, or any attachments or enclosures associated herewith, that is later proven untrue in any material respect, the company on which I submitted this form on behalf of may be disqualified from current incentive programs administered by the Office or may be ordered to repay the Office the said company in connection with any current incentive programs administered by the Office. OCIO makes no guarantees as to whether the information supplied by you will result in any change to the Broadband Availability Map V4 or the way any incentive decisions are reviewed, scored, or decided. This form, as completed, any attachments hereto, and any other information or materials submitted to the Office in connection with this form or related inquiry, shall be considered public records and shall be made available for public examination and/or disseminated upon request by third parties as required by

| Please familiarize yourself with t | he following terms prior to determining whether a broadband block may be appealed.  |
|------------------------------------|---|
| Targeted Service Area              | A Targeted Service Area (TSA) is a census block within which no communications service provider offers or facilitates broadband service at or above the tier 1, tier 2, or tier 3 download and upload speeds.   |
| Existing Broadband Speed Tiers     | The speed tiers used to determine whether a broadband block qualifies as a Targeted Service Area on the Statewide Broadband Availability Map.   |
| Tier 1                             | A maximum download speed of less than 25 megabits per second (Mbps) and a maximum upload speed of less than 3 Mbps.   |
| Tier 2                             | A minimum download speed of greater than or equal to 25 Mbps but less than 50 Mbps. No minimum upload speed is applicable for Tier 2.   |
| Tier 3                             | A minimum download speed of greater than or equal to 50 Mbps but less than 80 Mbps. No minimum upload speed is applicable for Tier 3.   |
| Non-TSA                            | A non-TSA is a census block in which speeds are Facilitated at greater than equal to 80 Mbps  |
| Facilitate                         | A communication service provider's ability to provide broadband service at or above the download and upload speeds defined above to a home, farm, school, or business within a commercially reasonable time and at a commercially reasonable price upon request by a consumer. This does <i>not</i> pertain to the Broadband Infrastructure used to facilitate said service; Broadband Infrastructure is <i>not</i> a basis for appeal. |

| CENSUS BLOCK ID  190150206001255   | Connected Nation Definitions 1. In Error means data was reported incorrectly to FCC or Connected Nation. 2. Correct means data was reported coreectly to FCC or Connected Nation. 3. No Response means data was not reported to FCC or Connected Nation. 4. Unknown means data is incorrect for unknown | Speed Tier that is reflected on Map v.4 | What do you believe the Map should reflect for Facilitated service as of July1, 2021? |

Challenge Perry Rural

Perry Rural Broadband Expansion

Empower Rural Iowa Broadband Grants Program

### Minburn Telephone Company – OCIO NOFA #006 Census Block Eligibility Challenge Perry Rural

Minburn Telephone Company (Minburn) respectfully requests to challenge the census blocks included in this filing, which are also included in its NOFA #006 OCIO Broadband Grant, Perry Rural. The identified census blocks are currently being reflected as served on the Broadband Availability Map V4; however, it has been determined through the completion of thorough due diligence by Minburn's staff and supported by consumers in the specified areas that the claimed level of broadband service is widely overstated by the service providers.

Minburn is challenging each of the service providers claiming to provide broadband in the census blocks reflected in this challenge. In addition to Bits of Technology Wireless Internet, Mediacom, CenturyLink and Windstream are also claiming to provide broadband services in the area with each covering less than 5% and 48%, respectively. As reflected in the residential affidavits obtained, the service offered by each provider is not at the speeds being claimed.

The following supporting documentation for this challenge has been broken out into five sections: 1) Dallas County Information; 2) Perry Rural Research; 3) Bits of Technology Wireless Internet Challenge; 4) Residential Affidavits; and 5) Other Supporting Documentation.

### **Dallas County Information**

Information found in this section was provided by HR Green and the Greater Des Moines Partnership. The images depict the results from a May 2021 survey of residents and businesses throughout central lowa. The survey responses presented here highlight the current gaps in broadband availability, speed/performance, reliability, and affordability in Dallas County.

### Perry Rural Research

This section contains information that was provided by CheckPoint Solutions via data collected from Minburn's the crowd sourcing tool. The CheckPoint Solutions platform is used by providers to mine data on current broadband availability such as speed tests of existing connections as well as gathers demand generation of interest. The research offers a graphical representation of the speed tests completed in the challenge area that supports the challenge form.

### Bits of Technology Wireless Internet Challenge

This narrative represents an analysis conducted within the past 60 days as to the current service providers, specifically Bits of Technology Wireless Internet (BTWI), and their current marketing and service offering claims. Findings offer technical arguments to explain why BTWIs current offerings are overstated.

### **Residential Affidavits**

The residential affidavits included in this section are signed and notarized by consumers in the challenge area stating broadband service is unable to be provided at the speeds being claimed by the current providers which include, but are not limited to, BTWI, Mediacom, CenturyLink, and Windstream.

To further support our position, Minburn is sharing an unsolicited video recorded by a resident. He posted the video on a community board to encourage and educate his neighbors of the struggles of finding reliable broadband service. The video can be viewed at: <a href="https://youtu.be/D1fFVyrWnR0">https://youtu.be/D1fFVyrWnR0</a>.

### **Other Supporting Documentation**

The final supporting documentation contains a direct mail postcard advertisement received by a consumer residing within the challenge area of Perry. The postcard was sent via USPS by Bits of Technology Wireless Internet (BTWI). As shown, the postcard message offers **UP TO 30 Mbps;** however, this speed is significantly less than what BTWI has claimed they are able to deliver per the Broadband Availability Map V4.

# Challenge – Perry Rural Bits of Technology Wireless Internet Challenge

Perry Rural Broadband Expansion

Empower Rural Iowa Broadband Grants
Program

### SECTION 3) Bits of Technology Wireless Internet, LLC Challenge

Bits of Technology Wireless Internet, LLC (BTWI) is listed as having advertised throughputs of 100/50Mbps (downlink/uplink, respectively) throughout the Census Blocks (CBs) that Minburn Telephone Company (Minburn) is presenting within this challenge, as shown below.

Through field validation at common Bouton site, Minburn documented that BTWI is utilizing equipment manufactured by Ubiquiti Networks (Ubiquiti) in the unlicensed 2.4GHz and 5.2/5.8GHz frequency bands, as well as the lightly-licensed, Part 90 frequency band.

For its unlicensed operations BTWI is utilizing Ubiquiti's LTU and Rocket 2AC Prism equipment. The manufacturer documentation for the Ubiquiti LTU equipment indicates for the maximum channel width of 50MHz is capable of achieving a maximum throughput of 600Mbps (aggregate, uplink and downlink). With a maximum of 600Mbps throughput, at the 100/50Mbps advertised speed tiers, if dedicated, BTWI would only be capable of servicing four to six subscribers<sup>1</sup> per LTU sector, assuming BTWI is able to secure an unencumbered 50MHz wide channel with the unlicensed 5GHz band.

The manufacturer documentation for the Ubiquiti Rocket 2AC Prism equipment indicates for the maximum channel width of 40MHz is capable of achieving a maximum throughput of 330Mbps (aggregate, uplink and downlink). With a maximum of 330Mbps throughput, at the 100/50Mbps advertised speed tiers, if dedicated, BTWI would only be capable of servicing two to three subscribers<sup>2</sup>

<sup>&</sup>lt;sup>1</sup> Four subscribers if considering the aggregated throughput or six subscribers is considering only the downlink throughput.

<sup>&</sup>lt;sup>2</sup> Two subscribers if considering the aggregated throughput or three subscribers is considering only the downlink throughput.

per Rocket 2AC Prism sector, assuming BTWI is able to secure an unencumbered 50MHz wide channel with the unlicensed 5GHz band.

BTWI is also utilizing its Nationwide Nonexclusive, Part 90 license (3650-3700MHz), under Call Sign WQOU655, to deliver service to the CBs that Minburn is challenging. In 2015, the FCC released its Part 96 ruleset (3550-3700MHz), which encapsulated the spectrum formerly licensed under its Part 90 ruleset. The FCC allowed existing operators to continue operating their Part 90 networks through October 17, 2020, or through the expiration of their license terms, whichever is longer. BTWI's license under Call Sign WQOU655 has a license expiration of February 3<sup>rd</sup>, 2022, at which time BTWI must transition its operations to follow the Part 96 ruleset or cease operations. Per the FCC's Universal Licensing System (ULS), BTWI has twelve site locations<sup>3</sup> registered and each site location indicates that it utilizes equipment with the FCC ID of SWX-M365. FCC ID of SWX-M365 is Ubiquiti Networks (Ubiquiti) M365 product line and it is worth noting that the Ubiquiti's M365 product line has not received FCC type-acceptance for the operation under the Part 96 ruleset. The lack of FCC type-acceptance will require BTWI prior to February 3<sup>rd</sup>, 2022, to replace its Part 90 network with a Part 96-compliant manufacturer, equipment capable of operating on different frequency band or cease operations altogether.

With its unlicensed operations, its Part 90 license expiring on February 3<sup>rd</sup>, 2022, and the uncertainty created by its selected manufacturer, Minburn questions BTWI's viability to deliver a sustained, consistent 100/50Mbps service to the majority of the locations in the indicated rural CBs utilizing typical customer configurations and site loading considerations.

<sup>&</sup>lt;sup>3</sup> Per the FCC's definition each individual Part 90 sector needed to be registered and authorized by the FCC prior to operation, so in terms of the ULS a sector is equivalent to a site, although in industry-speak a site may be deployed supporting multiple sectors. In BTWI's case there are twelve sectors comprising 8 different site locations.

# **SWORN STATEMENT OF Daniel J. Spellman**

- I, Daniel J. Spellman, being of lawful age and duly sworn, state as follows:
- 1. My name is Daniel J. Spellman.
- At 12:38 P.M. on 7/13/2021, I called CenturyLink to inquire about getting internet service at 15292 Hull Avenue, Perry, Iowa 50220. I have attached my notes from my call with Trafar, CenturyLink Customer Care Agent.
- 3. I called Century Link Customer Service at (888) 856-2778.
- 4. I spoke with Trafar, CenturyLink's Customer Care Agent who informed me I have no residential service options for internet.
- 5. Trafar told me that Century Link doesn't offer service to me at this time and has no plans to extend service to our address but we could try a satellite provider not affiliated with their company.
- 6. The call ended at 12:55 P.M.

7. This completes my Sworn Statement.

## SWORN STATEMENT OF John Cavanaugh

- I, John Cavanaugh, being of lawful age and duly sworn, state as follows:
- 1. My name is John Cavanaugh.
- 2. At 9:24 AM on 7/12/21 (date), I called Bits of Technology Wireless Internet LLC (BTWI) (company name), to inquire about getting service at 396 329th Place (address), Perry, IA (city,state). I have attached my notes from my call with Billing Department (name not provided) and Steve (technician) (CSR name/title), and have labeled it "Attachment A."
- 3. I called the <u>BTWI</u> (company name) number <u>515-465-3043</u> (telephone number).
- 4. I spoke with <u>Billing Department (name not provided)</u> (CSR name) who informed me I have <u>5 or 6</u> residential service options:
  - 10M/3M for \$55
  - 15M/5M for \$65
  - 20M/6M for \$75
  - 30M/10M for \$85
  - 50M/16M for \$100
- 5. (Additional notes)

BTWI just upgraded speeds in the past few weeks. A new 100M/50M was just added, but I was told I likely don't qualify for this due to line of sight issues with the towers.

- 6. The call ended at 9:32 AM.
- 7. This completes my Sworn Statement.

#### ATTACHMENT A

#### PHONE CALL NOTES

I called BTWI at 515-465-3043 at 9:24 AM on 7/12/21. I was greeted by the Billing Department employee who did not provide her name. I told her I was an existing subscriber, and that I had both billing and technical questions. We covered the billing questions first, before I was transferred to a technical resource.

I asked about the recent speed increases and the pricing changes. She informed me no pricing changes had occurred. I was told each speed tier was increased by 60%. The current speed tiers are:

- 10M/3M for \$55
- 15M/5M for \$65
- 20M/6M for \$75
- 30M/10M for \$85
- 50M/16M for \$100
- 100M/50M with a quote for custom hardware and installation

Although the website has been updated to reflect the new plans, no official notice has been sent to customers as they are still evaluating the impact of the upgraded speeds on the network. They expect a notice will be sent to customers soon.

I spoke to Steve next regarding the technical issues. He has not received any new information on what the technician saw last week and the follow up they were going to have with the tower specialist. He said he would ask about this and call me back when he has more information.

#### BACKGROUND

I have been a BTWI internet subscriber since moving to Perry in 2017. For much of this period, I have subscribed to the top speed tier. As network engineer who works remotely instead of commuting into the Des Moines metro every day, reliable broadband internet is vital.

My roof was damaged in the derecho storm last year, and after having it replaced this spring, BTWI had to remount the antenna equipment. There were problems after this, but BTWI was quick to try to resolve the issue, even installing a new sector antenna at the tower to try to improve service. This has worked very well at the 30M/10M speed up until mid-June.

After calling BTWI, they confirmed that on 6/18/21 at 3:00 AM, my signal strength sharply dropped by 16db. The first call that I made somehow fell through the cracks, and no ticket was generated. After the July 4<sup>th</sup> weekend, I decided to follow up. Steve confirmed again the drop in signal strength, but

this time they had a technician come out within 30 minutes to troubleshoot the issue. After trying to adjust the antenna, the technician said that while the signal improved by 1-2db, they couldn't get back to the level they had before June. They are continuing to investigate this pending a follow up with their tower specialist.

Despite their recent increase on my plan from 30Mb/s to 50Mb/s, I am only achieving download speeds from 10-32Mb/s depending on the varying signal strength. The technician said if they can't get the signal improved that it may be best to drop to a lower speed tier like the 30M/10M due to match the real speed expectations between my location and the tower.

#### **100M/50M PLAN**

I was unaware of the speed increases by BTWI until I reviewed the OCIO broadband map to determine why our "Targeted Service Area" didn't qualify for NOFA #006 broadband grant funds. I see that most of our rural area is disqualified by the 100Mb/s plan offered by BTWI.

I commend BTWI for their efforts to improve connectivity in rural Iowa. I have appreciated their speed to resolve issues and the personal service offered by their staff. However, I would strongly urge that their 100Mb/s service not be considered generally available for the following reasons:

- I was told that while the 100M plan is now on their price sheet, no residential customers have it currently. I was told they will be having a meeting this week to discuss deployment details.
- The service requires custom hardware and installation that requires a quote. This is comparable to the more costly and customized business tier services they provide. The price is undefined, which makes it hard to compare to other residential broadband options.
- I believe the service is delivered using unlicensed spectrum (2.4Ghz or 5Ghz). This overlaps with consumer grade wireless equipment. This invites interference which can negatively affect service quality. It could be unfair to compare it with dedicated LTE spectrum or dedicated fiber or copper infrastructure.
- I was told that with my line of sight issues, I would likely be unable to take advantage of the service myself. I am just one example, but I think this illustrates the varied reach and quality of fixed wireless solutions. This makes it easier to overestimate homes passed when compared to dedicated copper or fiber infrastructure, which is much easier to quantify.

414 2<sup>nd</sup> St Perry, IA 50220

Internet history here at this address.

The first intent service I had was PrairieInet service that was over the air service. This service was relatively good for the time but the service degraded because trees matured, they caused interference between my house antenna and the water tower source. I had find a new service.

I had CenturyLink phone service in my part of town. The only problem was that the infrastructure was so old that the copper wire insulation was deteriorating to the point there was a lot of noise on the lines. The tech had to keep finding wire pairs without marker wires to provide good phone service.

I made the jump to CenturyLink internet but it was never very fast and my job in Des Moines needed me to have good service. I needed faster speeds so I jumped to a bonded pair of wires and was to have 20 meg speed. This service was not reached at most it was 10 meg. I put up with this service for years and was never pleased with the service. CenturyLink never felt the upgrading of the infrastructure was worth their time and money. They also used shady advertising by saying they had installed fiber service. They installed fiber to feed the copper that was the weakest link they had. Time to change.

Mediacom was the only solution. BTWI Wireless Internet was not useful because of the trees between my location and their towers. I first went with the 20 meg service from Mediacom for several month and it work ok but was subject to outages. Then they offered us 1 gig service at the same price so we took that option.

I have attached and excel spreadsheet that shows the actual speeds over several years. This was also accompanied by a under par service customer service.

The other major issue I have is none of the services a backup for their internet feed. We have had several times that construction workers have hit lines feeding Perry and taken out all internet and phones. I am in the process of creating a business web site and I am going to need to have a dependable system for that system.

My background is I am a retired computer programmer.

I have visited with some of the business users in Perry, IA and found that Minburn Communications has developed a very dependable fiber system. Several of the companies had dropped their backup internet service because Minburn fiber was so dependable.

I feel that Perry lowa is an underserved in it communications to the outside area and needs to have more competition that would improve all of the services provided to the citizens of the community.
