To Whom it may concern,

My name is Karla Boeckenstedt and live in the Timbergate Association, just south of Earlville, IA. We are challenged to find a internet provider with service in our area. Frequently our disabled daughter needs to use virtual learning and my husband needs to attend Zoom meetings from home. Broadband would provide reliable and affordable internet access. Please consider our community for Broadband!

Sincerely,

Karla Boeckenstedt

To Whom it May Concern

I currently work for a retirement plan company that has transitioned a large amount of its workforce to remote (work from home) employment, I'm an EMT and the current Fire Chief for our local Volunteer Fire Department. Living in a rural community has created challenges when it comes to my work life with having poor / limited-service options and truly no high-speed solution. Whether it be walking clients or participants through their 401(k) offering and constantly waiting for websites to buffer and load to working on Fire/EMS Reports through web-based portals takes a lot of time away from an already busy life.

I'm also a father to 7-year-old twins who are at the start of their education journeys. Over the past few years, we've all seen an uptick in virtual learning whether it be from a classroom perspective to homework and learning games for the kids to continue and develop. With the poor quality of service/access available it makes it extremely difficult for our children to stay engaged.

I believe we owe it to our communities big or small along with our children who are our future to offer a better internet solution in order to keep up with our fast-paced lives and ensure we are getting the most out of each and every day.

Sincerely,

Matt Erickson

Dear Sir

We heard that you might be bring fiber optic internet to our area,
it would be nice to have faaster, more reliable, and more efficent
internet to our area,
we are retiring and would like a more afforadable internet.
We hope you come our way.

Mary Pasker
