

Chickasaw County
8 East Prospect Street
New Hampton, Iowa 50659

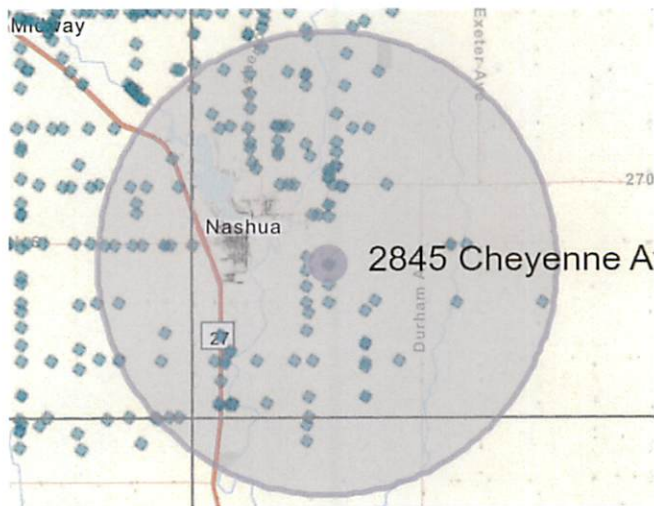

March 31, 2023

To the Iowa Office of the Chief Information Officer:

The County of Chickasaw is submitting an application in response to the OCIO Invitation to Qualify for a Broadband Intervention Zone. The County of Chickasaw has found areas within the county pertaining to current broadband availability.

The broadband intervention zone will be covering Western portions of Chickasaw County including Nashua, Iowa and Bradford Township which includes US Hwy 218 and Hwy 346. The area is currently served by 4 broadband providers, however current internet speeds are inconsistent and not verified as reliable.

The proposed intervention zone would bring enhanced connectivity to 119 households and businesses that have been identified as being under-served in this regard.

Stable and enhanced internet infrastructure is vital to economic growth, quality of life for rural residents, and to support educational goals of students in elementary school through adult learners.

Sincerely,

Matthew Kuhn
Board Chair
County of Chickasaw
