

To the Office of the Chief Information Officer of the State of Iowa,

The Cedar View Estates Subdivision of Monticello Iowa is submitting this application in hopes to Qualify for a Broadband Intervention Zone. Cedar View Estates Subdivision of Monticello, representing residents, has identified its' community as an area of concern for existing broadband availability.

We would like to request that our rural subdivision be established as a Broadband Intervention Zone. Based on the Iowa Broadband Map v.5, our area is currently underserved with speeds that do not meet the required 100/20 minimum threshold.

It is our hope that the ITQ application will help justify the need for our area to become a Broadband Intervention Zone and considered for the next broadband grant program.

Don Peters

A handwritten signature in black ink that reads "Don Peters". The script is cursive and fluid, with the first letters of "Don" and "Peters" being capitalized and prominent.
