

Lucas County Board of Supervisors
Lucas County Courthouse
Chariton, Iowa 50049

March 23, 2023

To The Office of the Chief Information Officer of the State of Iowa:

Lucas County, Iowa is submitting this application in response to the OCIO Invitation to Qualify for a Broadband Intervention Zone. Lucas County, representing local businesses and residents, has identified a specific area of geographic concern with regards to existing broadband availability.

As such, we are proposing that a Broadband Intervention Zone be established for the 8-mile perimeter in and around the community of Chariton in Lucas County, Iowa. Pursuant to the Iowa Broadband Map v.5, this area is currently being served by 7 broadband providers but with speeds that do not facilitate the required 100/20 minimum threshold for robust connectivity.

It is our hope that the ITQ application and review of same by OCIO will designate Chariton and rural Lucas County as a geographic area concern/ Intervention Zone for consideration in the next broadband grant program.

Sincerely,

A handwritten signature in blue ink, appearing to be "K. J. Deane", is written over the "Sincerely," text.

Office of the Chief Information Officer
200 E. Grand Ave.
Des Moines, IA 50309

To the Office of the Chief Information Officer of the State of Iowa:

On behalf of the 12th Senate District of the state of Iowa, I am writing to express my support for Chariton Valley Planning and Development Council's application for Broadband expansion in the communities represented in the most rural areas in my district.

As a supporter for the Empower Rural Iowa Broadband Grant Program, I am keenly aware of the disadvantages to rural Iowa due to the lack of access to reliable, high-speed Internet. An investment from this grant opportunity will improve services and the quality of life to the citizens of our communities.

As a member of this community and a policymaker for them, my interests and objectives are continued support of quality rural healthcare. As rural healthcare options become more scarce, improved technology will become more important. Doctor specialists are few and far between in rural communities. The ability for rural providers to have radiology results sent and returned quickly depends on access to broadband Internet. Transportation for some patients is limited, due to the travel distances to providers. A reliable broadband Internet allows for telemedicine visits to allow for flexibility in doctor's visits and removing the transportation barrier to care. Medical billing and patient access to records would improve with electronic means via broadband access. My support for this grant and universally available broadband Internet, is an extension of my efforts to support access to quality healthcare for my community.

This initiative will clearly improve the healthcare outcomes in rural Iowa. For this reason, and the many other advantages, I hope you agree that this project is a wise investment of these grant dollars.

I urge you to support the Chariton Valley Planning and Development Council of Government's project approval and grant request.

Sincerely,

A handwritten signature in blue ink that reads "Amy Sinclair".

March 24, 2023

To the Office of the Chief Information Officer of the State of Iowa:

My name is Joseph P. Crall and I am employed by First Iowa State Bank of Albia, Iowa. My company employs approximately 50 people and we have been part of the local community for 93 years. Internet speed can have a direct impact on the efficiency of our business and products. It is a critical component of communication, shipping/delivery, orders and production.

Maintaining a complete workforce can also be impacted by broadband services. Attracting and retaining qualified employees is increasingly difficult. One of the major impediments to this is our community's inability to provide affordable, reliable internet services. Potential employees do not want to relocate to areas that do not have good access to the internet. Similarly, we have lost several employees who have moved to more urban areas where internet is more readily available.

Sincerely,

A handwritten signature in black ink that reads 'Joseph P. Crall'. The signature is written in a cursive, flowing style.

Joseph P. Crall,
Executive Vice President

To Whom it May Concern,

As President of Indian Hills Community College, I am always concerned about quality, high-speed internet access for our students who often live at home in rural Appanoose County while attending our College. Virtual learning during the pandemic was (and still is) a challenge for our students who need access to quality and affordable internet access. Students without online access or have poor access, struggle with their academic success. We owe our students the ability to engage, learn and succeed and better internet services in our area is required to do so.

When comparing urban peers to rural students, it is evident that rural students face more challenges in accessing the technology and connectivity needed for remote learning and telehealth. Inadequate broadband infrastructure is a critical barrier to the provision of telehealth services and remote learning in rural areas. Efforts to improve policies and advance technology must consider geographical disparities to ensure health and education equity for youth and all residents.

It is our hope that the ITQ application and review of same by OCIO will designate Mystic and rural Appanoose County as a geographic area concern/ Intervention Zone for consideration in the next broadband grant program.

Sincerely,

A handwritten signature in black ink, appearing to read 'Matt Thompson', is written over a horizontal line.

March 27, 2023

To The Office of the Chief Information Officer of the State of Iowa:

I am writing this letter in support of the Chariton Valley Planning & Development (CVP&D) Council of Governments' response to the Invitation to Qualify for a Broadband Intervention Zone.

As a business owner, located in Centerville, I can attest to the need for reliable internet service. A dependable internet connection is critical to business operations. It allows my employees to communicate and work seamlessly when on job sites and enables quick retrieval of data so they can work efficiently.

Recruiting and retaining employees is challenging in our rural community. Providing essential amenities, like affordable and reliable broadband services, is indispensable for growing and expanding business.

I also have two children in the Centerville Community School District. Online education has become a standard in learning and teaching. Unreliable, slow, and limited internet access results in a significant disadvantage to the students in our rural community. We must ensure that our children have the same access to internet services as do students in urban areas.

I strongly encourage you to favorably consider CVP&D's response and am confident that improving broadband options and efficiency in Appanoose County will aid in attracting and maintaining employment and provide necessary learning opportunities for our youth.

Respectfully submitted,
HALL ENGINEERING COMPANY

March 24, 2023

To The Office of the Chief Information Officer of the State of Iowa:

Chariton Valley Planning & Development Council of Governments is applying on behalf of rural Appanoose County, Iowa and the City of Mystic in response to the OCIO Invitation to Qualify for a Broadband Intervention Zone. Appanoose County, in association with local organizations within the represented geography, has identified a specific area of geographic concern with regards to existing broadband availability.

As such, we are supporting the proposal that a Broadband Intervention Zone be established for the 8-mile radius around the community of Mystic, Iowa in Appanoose County. Pursuant to the Iowa Broadband Map v.5, this area is currently not being served by broadband providers that can support consistent broadband speeds of 100Mb/20Mb deemed necessary for robust connectivity.

The prospective Broadband Intervention Zone would bring much needed broadband connectivity to approximately 576 currently underserved or unserved homes and businesses in the area as further represented by the diagram below:

Robust broadband is critical to this area's continued economic growth, and to ensure local citizens have access to essential infrastructure required for health, safety, and education of current and future generations.

Sincerely,

Tammy S. Wheeler
CEO/General Manager

Operations Project Manager

To The Office of the Chief Information Officer of the State of Iowa:

My name is Phil Brown, and I am the Operations Project Manager for the U.S. Army Corps of Engineers at Rathbun Lake. My office employs eleven (11) full time, up to three (3) seasonal workers, and as many as twenty-four (24) volunteers that reside in our campgrounds providing essential services for the visiting public for six (6) months every year. Additionally, we have approximately 650,000 visitors annually to Rathbun Lake.

Our workers and visiting public are a vital part of the local community and reliable internet services is critical to our mission success. We support Chariton Valley P&D council and their application on behalf of rural Appanoose County.
