To Whom it May Concern,

As business owners directly on Lake Delhi in Iowa that has 8 full time employees and 10 seasonal employees, we are thrilled to voice our support for efforts to expand internet access in the Lake Delhi, IA area. We strongly believe that improving internet infrastructure in our community will have a transformative impact on our business and on the businesses and citizens around us.

With access to fast and reliable internet services, our business can more effectively communicate with clients and customers, access important information, and streamline our operations. This, in turn, will help us to better serve our customers and grow our business.

But the benefits of improved internet access go far beyond our own business. By providing internet access to all businesses in our community, we can create a more level playing field for smaller companies, helping them to compete with larger businesses and thrive in the digital age. In addition, creating the ability for people to work remotely in their careers is absolutely necessary for us to continue to grow as a community.

Moreover, internet access can help to spur economic development and job creation in our community. With the ability to connect to the global marketplace, businesses in Delhi can expand their reach and attract new customers from all over the world. This, in turn, can help to drive economic growth and create new opportunities for businesses and residents alike.

In short, improving internet access in the Delhi, IA area is a win-win for everyone. By investing in our digital infrastructure, we can help our businesses grow and thrive, create new jobs and opportunities, and build a stronger and more vibrant community. I wholeheartedly support efforts to expand internet access in our area and look forward to seeing the positive impact it will have on our community.

Sincerely,

Patrick & Wendy Vance

March 27, 2023

To Whom It May Concern:

During the pandemic, the Maquoketa Valley School District greatly increased the number of computers available to our students. The problem during the pandemic, which still exists today, is that we have very poor internet service to the homes in the Lake Delhi area. Our students struggle to get adequate internet service to complete homework or to do research while at home. We would have very limited opportunity to provide virtual learning to all students if the need arises. We always have some students who are medically fragile, injured, or ill who need virtual learning. Increasing the quality of internet service would be a great benefit to our students.

It is my hope, along with all the educators of the Maquoketa Valley School District, that the Lake Delhi region can increase the quality of internet service to our area. This will benefit all residents in our community and especially the students of the Maquoketa Valley School District.

Sincerely,

A handwritten signature in blue ink, which appears to read 'Dave Hoeger', is placed below the word 'Sincerely,'.
