ITQ Application

OCIO

To the Office of the Chief Information Officer of the State of Iowa:

I am representing the Cedar Cove Road Association, a group of 11 properties that share a need for a reliable high speed broadband service. We are submitting this application to the OCIO Invitation to Qualify as an intervention zone. Our current service provider does not meet the minimum 100/20 threshold. There are two permanent residents currently living on the lane, with 4 to 6 more that are planning on making this their permanent home, The major drawback to them being able to live here full-time is the lack of reliable broadband. Business, health, education, and social connectivity is vital to our area. I have fourteen letters of support from residents, school administrators, and businesses. I could only provide three in your form.

The map radius below is .5 mile, the application required at least a 1 mile radius.

Sincerely,

Dan Reyner

Mayor, Cedar Cove Road Association
