RE: Henry County ITQ

Please accept this letter of support and demonstration of need for all Henry County ITQ submittals. The Henry County Board of Supervisors fully supports broadband investment for unserved and underserved areas of Henry County.

Large, private companies have largely not invested in rural Henry County broadband service. Lack of investment has resulted in rural Henry County having fewer overall opportunities to connect with modern broadband infrastructure. The limited availability therefore limits rural Henry County residents' ability to connect with healthcare, education, economic, and other resources made possible by broadband connection.

We are very pleased to have private partnerships with Danville Mutual Telephone Co. and Farmtel Communications totaling \$1.4 million from county ARPA funds to expand broadband in Henry County now and into the future.

Broadband investment is critical to future economic development and quality of life in all of Henry County. Broadband is simply indispensable and required in our daily working, school, and personal lives.

The OCIO's work is appreciated and needed in Henry County, and we look forward to working with you to expand broadband connections in Henry County into the future.

Sincerely,

Henry County Board of Supervisors:

Marc Lindeen

Greg Moeller
