

The Longs acquired the Killduff Telephone Company in 1974. Since that time the Company has provided local service, long distance toll services, and broadband internet services. The Company has provided the management, service, maintenance and billing for its subscribers. In 2015 the Company began a program to upgrade the copper based facilities to fiber to the home (FTTH). We are at a point where this Grant would permit us to extend to surround subscribers and have all subscribers converted to FTTH within the terms of the NOFA-#003.
