

July 31, 2020

To whom it may concern,

As a residential homeowner at 31120 Bellevue Cascade Road, west of Bellevue, Iowa, I can confirm that my residence is unserved for high-speed Internet bandwidth. My home is not in the line of sight for terrestrial wireless tower Internet service due to the surrounding hills and bluffs of the Mississippi River valley.

Without high-speed broadband Internet, with sufficient upload and download speeds, telework and distance learning are difficult or inaccessible. The ability for my residence to connect virtually for telework, online learning, or telehealth services would be a lasting benefit beyond the current Covid-19 pandemic circumstances.

Sincerely,

(signature)
