Date: 7/20/2020

Demonstrated Experience:

Sully Telephone Association was incorporated in 1904. We have over 12 years of experience in construction of central office fiber-optic equipment and fiber-optic outside-plant communications. Seven years deploying active ethernet dedicated Fiber-to-the-Home (FTTH) Technologies.

Sully Telephone provisions, maintains and services to over 1100 active Fiber-to-the-Home customer lines in five rural telecommunication exchanges. We have seven construction seasons (years) of experience from 2014 to 2020 with FTTH central office equipment, outside-plant construction, splicing and cutover work. We continue to expand our FTTH footprint each year as financially possible in order to reach 100% FTTH to all our customer locations.

Sully Telephone continues to resolve all customer trouble reports within 24 hours and provide new service requests within two days.
