Good morning,

As part of the steps Interstate Cablevision took in identifying the areas to include in its application to the OCIO for broadband grant funding, a review of the maps available was completed. In addition, based on our understanding of the area and information available, only those census blocks that are not receiving broadband service at 25M/3M to the best of our knowledge were included in the application. Interstate Cablevision's application is only including 11 broadband units within Targeted Service Areas (TSA) and does not include any broadband units within non-TSA areas. All of the broadband units are unserved.

Interstate Cablevision confirms that based on our knowledge of the total service area, the units included in the project service area are unserved, meaning unable to receive broadband at speeds of 25M/3M or greater. Should the OCIO award this application grant funds, Interstate Cablevision also confirms they will build out a Fiber-to-the-Home network, whereby all 11 units will have access to broadband at speeds up to 1Gig.

Thank you,
