Executive Project Summary – NOFA #0003

This project is a Fiber-To-The-Home plan consisting of installing 35,000 feet of buried fiber cable in Franklin County beginning at Geneva, Iowa going west on 105th St to Hwy 65, then north to 110th St., then West to Olive Ave.

Dumont Telephone Company has been an established service provider since 1902 and a Fiber-To-The-Home expert since 2006. We are very familiar with this technology and this is just a simple extension of our existing network.

This project is in the planning stage, engineering is engaged and the material list is ready to be ordered.
