**Exhibit B — Broadband Grants Program Infrastructure Worksheet ( Use For Infrastructure Projects Only )**

**Applicant Name: West Iowa Telephone Company**

Applicants should identify all Delivery Platforms forming the basis of their Project by selecting all Delivery Platform types that are projected to be deployed as part of the Project. Consistent with the definition of Facilitates, Applicants must identify the upload/download speeds on an individual census block basis that their Project will Facilitate in the "Facilitated Speeds" column below; this may be based on the most favorable product offering that will be made available within each of the census blocks forming the basis of a Project and that will be made available within a commercially reasonable time and at a commercially reasonable price.

Applicant certifies that each of the unserved Broadband Units in the form of Homes, Businesses, and Schools located within Census Blocks forming the basis of the Project that will be Facilitated with 25/3 Broadband or 100/20 Broadband, as applicable, as a result of the Project DO NOT currently have 25/3 Broadband service available, meaning no other known Communications Services Provider currently Facilitates 25/3 Broadband or greater to the Broadband Unit.

**Exhibit B.1 — Broadband Grants Program Adoption Worksheet ( Use For Adoption Projects Only )**

**Applicant Name: West Iowa Telephone Company**

Using the guidance provided in 1.5.2.1 of NOFA #003, identify in Table 1 below the number of potential Non-Adopters within each school district you anticipate will adopt 25/3 Broadband or faster by the Adoption Completion Date (December 1, 2020).

Instructions are outlined below a follows:

Step 1: Enter the Number of School Districts Impacted by your project.

Step 2: Left click the Refresh button.

Step 3: Using the drop down box in the School District column, select the specific School District in each row impacted by your project.

Step 4: Enter the Estimated Number of Potential Non-Adopters in each School District that comprises your project.

Total estimated number of non-adopters:	0
Maximum award of estimated number of non-adopters:	\$ -
Project Economic Necessity Factor:	-

Number of School Districts Impacted: 0

Potential Number of Non-Adopters per School District - Table 1					
School District	School District Number	% Free and Reduced Lunch	% Without Broadband	School District Economic Necessity Factor	Estimated Number of Potential Non-Adopters
END OF DATA					

1. Describe the methodology you will utilize to determine Non-Adopter eligibility as defined in NOFA #003 Sections 1.4.8.3. and 1.4.8.4.

(Maximum 1200 Characters / Actual = 0)

\* Non-Adopters may not currently participate in the FCC's Lifeline Program for Low Income Consumers. (See NOFA #003 Section 1.4.8.1)

**Exhibit C — Qualitative Attributes Form - Infrastructure Projects Only**

**Applicant Name: West Iowa Telephone Company**

Applicant must fill out and submit this form in order to comply with/supply the information/inputs requested by the Office pursuant to Section 3A.1.2. (Qualitative Factors) of NOFA #003.

**Note: If you need additional space to answer any of the below questions, please upload supplemental materials to the appropriate section of the Iowa Grants System ("Overflow Materials") as further described in Exhibit J Step 41. In addition, in connection with any of the following factors, Applicants may provide evidence of need support for their Project by uploading materials through the Iowa Grants System as further described in Exhibit J Step 41, which materials demonstrate how communities, households, businesses, schools, or hospitals are hindered in their ability to respond to the challenges of COVID-19 due to a lack of at least 25/3 Broadband ("Supplemental Materials of Need"). Such evidence, by way of example only, may include letters signed and endorsed by community officials, including but not limited to the mayor, city administrator, county supervisor, superintendent, hospital administrator, etc.**

**1. Impact on Distance Learning, Telehealth and Telemedicine, and Telework**

These factors take into consideration the impact the Project will have on improvements in Iowa to support distance learning, telehealth, and telework in response to the COVID-19 public health emergency.

**Please answer or supply the Office with the following to assist it in scoring this factor:**

- 1.1. Describe how your Broadband Infrastructure Project will facilitate distance learning in the State of Iowa, through Broadband improvements, in connection with school closings to enable compliance with COVID-19 precautions. Generally speaking, Applications that demonstrate that the Broadband investments forming the basis of the Project will have a greater impact on distance learning needs in their response will receive higher scores.

Most of the targeted service area of WesTel's FTTH project is currently only able to get a 20/2 Mbps broadband connection. After the completion of our project, customers will have access to broadband speeds of up to 240 Mbps synchronous. This new fiber network will allow multiple users to access the Internet at the same time, enhancing distance learning for students. Students will be able to upload and download documents quickly and communicate effectively with instructors during distance learning.

(Maximum 1200 Characters / Actual = 506)

- 1.2. Describe how your Broadband Infrastructure Project will facilitate telehealth and telemedicine services in the State of Iowa, through Broadband improvements, in connection with treating and responding to COVID-19. Generally speaking, Applications that demonstrate that the Broadband investments forming the basis of the Project will have a greater impact on telehealth and telemedicine will receive higher scores.

Most of the targeted service area of WesTel's FTTH project is currently only able to get a 20/2 Mbps broadband connection. After the completion of our project, customers will have access to broadband speeds of up to 240 Mbps synchronous. This new fiber network will allow rural customers to schedule virtual visits with any capable healthcare provider. A low latency, high bandwidth connection will provide a better experience for rural customers to visually visit with healthcare providers without leaving their home.

(Maximum 1200 Characters / Actual = 523)

- 1.3. Describe how your Broadband Infrastructure Project will facilitate increased telework capabilities in the State of Iowa, through Broadband improvements, in connection with remote work arrangements implemented by employers in response to COVID-19 public health precautions. Generally speaking, Applications that demonstrate that the Broadband investments forming the basis of the Project will have a greater impact on telework capabilities will receive higher scores.

Most of the targeted service area of WesTel's FTTH project is currently only able to get a 20/2 Mbps broadband connection. After the completion of our project, customers will have access to broadband speeds of up to 240 Mbps synchronous. This new fiber network will allow multiple users to access the Internet at the same time, enabling employees to easily work from home. The higher bandwidth will provide a strong connection for employees to conduct virtual meetings, attend virtual conferences and trainings, and allow them to successfully host a remote office environment.
