

NEIT SERVICES, LLC**Executive Project Summary NOFA # 003**

The proposed project will expand NEIT's Fiber to the Home network to a currently underserved area of the Postville, IA telephone exchange. NEIT's existing network assets will be leveraged to expand into this area at a lower cost than would be incurred by other providers. The proposed project would construct an additional 10.67 miles of Fiber and would be capable of serving 42 existing residences and 11 businesses within the project area. These counts do not include potential customers who work remotely or on farm operations that increasingly rely on reliable, fast Broadband.
