Office of the Chief Information Officer

To clarify the submission of the number of HSB's included in our Exhibit B. We included some HSB's in TSAs 182052, 182461, and 182196 in our total as they are on the route we are building even though they are considered severed currently, as we have had inquiries from some of the households in TSAs 182052 and 182461 for service in the last year and would gladly provide a new fiber service to them as we build out this route. There are 16 households and 3 businesses which would be subtracted from our totals. Our total household count in the underserved and unserved TSAs will be 10 and business count will be 3.

Please let me know if you need more information.
