Carroll North – Interest Submissions

Each address plotted on this map represents an address in or near the proposed service area which has expressed interest in receiving service from WIN over the last 1 year, because it is currently underserved. In an area of approximately 25 square miles, over 30 addresses have expressed interest in having WIN build services to them. Some of these areas are in census blocks which are deemed to be served according to the broadband availability map, however customers in the area routinely report a poor experience or that they are not receiving the advertised speed they are subscribed to.
