

February 24, 2021

To whom it may concern:

I am pleased to strongly support the potential expansion of broadband to the community of Lowell, IA utilizing Danville Telecom Fiber Optic Internet service. We have seen firsthand the potential for area residents to telecommute for both productive work as well as educational instruction for our students throughout this pandemic. Giving all of our regional resident's access to high-speed internet will only be more critical in the days ahead. I encourage every community, regardless of size to provide the highest quality access available, and I cannot recommend a better organization than Danville Telco and IconnectYou.

Thank you for the opportunity to support this effort.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Hess", on a light-colored rectangular background.
