To Whom it may concern:

I am writing this letter on behalf of Danville Mutual Telephone. We would like to express our full support for Danville Mutual Telephone extending services to Lowell, Iowa. They have a long and successful history of providing state-of-the-art broadband service at advanced speeds to other rural communities, as well as a strong reputation for excellent customer service and community commitment. We are confident in their capabilities of enhancing broadband service for the community of Lowell, Iowa. As an unserved rural area with limited availability to advanced Internet services, they face many challenges including limited medical resources and distance between patients, physicians, specialists and facilities. Because of the rural nature of the area, the students do not receive equitable broadband resources as other students in more urban learning centers. The community currently lacks the research; distance learning, video and other tools that advanced broadband can bring to a rural school. Therefore, it is extremely important that Lowell, Iowa get the services they need in order to provide for their community.

Danville Mutual Telephone has provided state-of-the art broadband services to other rural communities that we have witnessed how much it has helped the businesses and private individuals. Without it, a lot of the students would not have been able to complete their studies during COVID.

Danville Mutual Telephone has a long and successful history of providing state-of-art broadband service at advanced speeds to other rural communities and has a strong reputation for community commitment and customer service, we are confident in their capabilities of enhancing broadband service for the rural area of Lowell, Iowa.

Sincerely,

Sara B. Sink, Owner
