RE: Internet speed

To Whom It May Concern,

Brooklyn Medical Clinic is located in a small town in rural Iowa. Due to the pandemic, our telemedicine visit's have increased substantially. We would certainly benefit, and welcome faster internet speed, especially for our video/audio appointments. Many of our patient's live in the rural area, and we often experience poor connection with the video part of the call.

Sincerely,

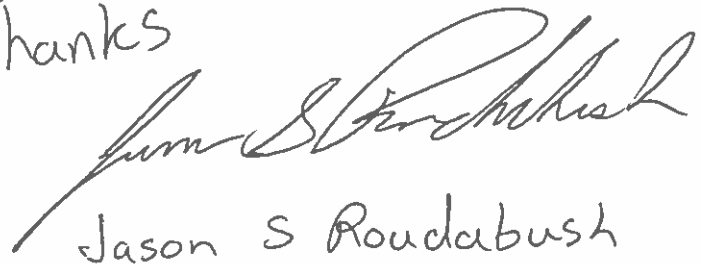

Patty Shine

To whom my concern

Putting in Fiber Optic in the rural area Poweshiek County is needed. For farmer access to information, online school and for daily business for rural people. It is needed in rural Poweshiek County.

Thanks

Dear Tim,

As I understand your company has plans to install fiber optics to my rural home. This installation would greatly improve my connection speed at my home. Our home has a wide variety of devices that connect to the internet for work, school, and play; many are connected at the same time so the improved speed and bandwidth that comes with a fiber connection would greatly benefit my household. I sincerely hope this project is completed soon.

Sincerely,

Kevin L James

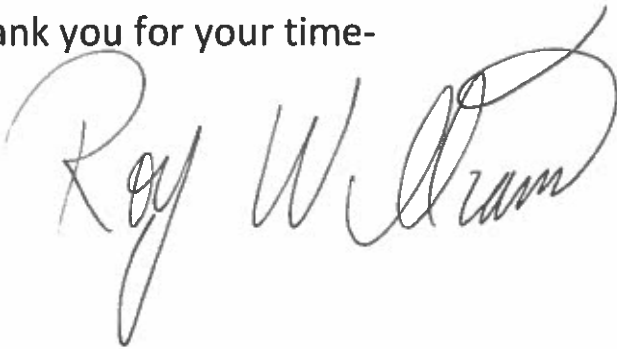

To whom it may concern:

I would like Broadband to the country, as it will be helpful to me and so many that are struggling with internet access.

With today's society and all the issues caused because of the Coronavirus, so many people are working from home or having to do online school at home.

Having the capability to great internet is crucial to so many households as their jobs or schooling depends on it.

Thank you for your time-

Subject: Fiber optic

To whom it may concern,
I have requested the possibility of getting fiber optic to my rural home. I have been asked to work from home weeks at a time because of the pandemic. My job entails the use of CAD files of considerable size. There are instances when files could be opened from the company network stored location and others when the files need copied to my local drive. It is difficult to plan for every file you might need and copy them for use. Then there is the copy that must be placed back to the network drive upon returning to work. This process isn't efficient.

Please consider this request to help everyone working from home.

Sincerely,

Rod Weiss
