Demonstrated Experience – NOFA #0005

Dumont Telephone Company has been an established service provider for 118 years (since 1902) and a Fiber-To-The-Home expert since 2006. We have built four communities and rural areas using both Active and GPON Fiber-to-The-Home technology with Adtran equipment, (a very experienced and established equipment vendor) to provide Voice, Video and Broadband services. Our staff is well-trained and has a combined 131 years of work experience at this company. We are very familiar with this technology and this is just a simple extension of our existing Broadband network. We were successful in receiving a grant from NOFA #003 and successful in completing the project on time.
