Re: Professional Engineer Review for Spring Grove Communications
2021 Iowa NOFA #006 Broadband Grant Application - Technical Review for
Dorchester FTTP Project

I have reviewed the Spring Grove Communications project approach, design, maps, equipment plans, and other related technical documents for this 2021 Iowa Broadband Grant Application.

The project as defined meets standard and well-engineered criteria for a project of this type and the XGSPON design will far exceed the Iowa requirements for this application with capability of 1G/1G or greater speeds.

Best regards,
