We want to strongly express our support for Kalona Cooperative Technology Company to expand its fiber network services in Washington County, Iowa.

"Home base" for our company is located one mile east of Washington at the intersection of Highway 92 and Quince Avenue. We currently employ more than 80 employees, have 6 breeding facilities and have more than 100 contract grower sites in the area, so reliable, consistent and efficient communication is especially important in our daily operations. We use several cloud-based applications in our system, and are currently replacing our office phone network with a cloud-based system. Internet in our rural area has improved over the years, but we need to have faster, more dependable service to support our every-day needs. Fiber would allow us to expand our current network and allow us to grow and upgrade to add more cloud-based products.

Reliable broadband speeds up to 1 Gigabit will support other growing demands in our area, as well as greatly assist from an economic development perspective. KCTC has been a viable provider in our area since the mid-1900's. Iowa's rural areas need these services to be available for our cities, towns and local businesses, both agricultural and non-agricultural, to be able to grow and flourish.

We understand that KCTC is working to extend fiber network services between Washington and Ainsworth. With two of the busiest locations in our system (our offices and our feed mill) directly located along this route, we strongly support all efforts to move this project forward as soon as possible.

For questions or further comments, please feel free to contact our office. We appreciate the opportunity to support this technological progress in our immediate area!

Sincerely,

A handwritten signature in dark ink, appearing to read "Heidi T. Vittetoe". The signature is fluid and cursive, with the first name "Heidi" being more prominent.

Subject: Re: Ainsworth Form for Fiber

Marcus Fedler
543 Monroe Street
Ainsworth, Iowa 52201

It is an honor to have been asked to write a letter of support for KCTC.

My business in Washington was one of the first to hook up to KCTC's new fiber offering in Washington. I jokingly asked that KCTC should hook up the entire county and start with Ainsworth.

Having a local business provide technology services and to the caliber offered by KCTC is extraordinarily important to a community. Having a local business offer this service, keeps leadership local, office staff local and most importantly tech support local! There's nothing worse than calling someone from out of state to schedule someone from out of town to work on your internet/phone or TV Service.

The economic development provided by having this sort of local business available keeps local money in the local economy. Very important to other small businesses in the area.

I understand that KCTC is indeed looking to expand their offering to Ainsworth. I strongly support this project be done and I also prefer that KCTC be the one to do it. I would be happy to talk with anyone directly specifically about this.

Marcus Fedler

Currently using Hughes Net + have had terrible luck. Very spotty + only works if you are in the same room as the modem. We would LOVE to switch to KCTC if possible! KQ
