Re: Professional Engineer Review for Farmers & Merchants Mutual Telephone Company  
2021 Iowa NOFA #006 Broadband Grant Application - Technical Review for  
Pekin Rural FTTP GPON Project

I have reviewed the Farmers & Merchants Mutual Telephone Company project approach, design, maps, equipment plans, and other related technical documents for this 2021 Iowa Broadband Grant Application.

The project as defined meets standard and well-engineered criteria for a project of this type and the Gigabit PON design will far exceed the Iowa requirements for this application with capability of 1G/1G or greater speeds.

Best regards,
