Dear Issuing Officer:

The need for fiber broadband in our communities like Mount Pleasant and New London is more necessary than ever, especially in areas that have historically lagged due to geographic and economic deployment barriers.

I want to thank Windstream for submitting an application that will connect my communities with truly reliable, fiber-fast internet available for local homes and businesses.

I was proud to support the \$100 million-dollar broadband effort. Public funds are almost always necessary to deploy fiber in remote areas that would otherwise be uneconomic to serve.

Broadband infrastructure is a key enabler for communities to access education and health care, provide remote work opportunities, and enhance economic development. Public and private sectors can bring unique yet complementary advantages to the broadband deployment effort.

Kinetic by Windstream's application brings an existing network infrastructure, engineering design, construction management and operational expertise to deployment projects.

Regards,

A handwritten signature in black ink that reads "Joe Mitchell". The signature is fluid and cursive, with the first name "Joe" and last name "Mitchell" clearly distinguishable.

To Whom It May Concern:

The need for fiber broadband in our communities like Knoxville, Pleasantville, Osceola, and Chariton is more necessary than ever. These communities are areas that have historically lagged in their ability to build out this necessary infrastructure due to geographic and economic deployment barriers.

I want to thank Windstream for submitting an application that will connect my communities with truly reliable, fiber-fast internet available for local homes and businesses.

I was proud to support the \$100 million-dollar broadband effort. Public funds are almost always necessary to deploy fiber in remote areas that would otherwise be uneconomic to serve.

Broadband infrastructure is a key enabler for communities to access education and health care, provide remote work opportunities, and enhance economic development. Public and private sectors can bring unique yet complementary advantages to the broadband deployment effort.

Kinetic by Windstream's application brings an existing network infrastructure, engineering design, construction management, and operational expertise to deployment projects. I offer my full support of their efforts on behalf of the citizens I serve.

Sincerely,

A handwritten signature in cursive script that reads "Amy Sinclair".
