

**Professional Engineer Certification**  
(For FCC Form 683)

**Applicant:** Farmers Mutual Cooperative Telephone Company

We the undersigned, certify that the proposed broadband system if implemented according to the design in the Auction 904 Long-Form Application will perform at the Gigabit performance tier and meet all requisite performance requirements for voice and broadband to at least 95% of the required number of locations in the state of Iowa. The reliability of the technology is comparable to networks of similar telecommunications carriers providing voice and broadband services. When implemented according to the design in the application, all of the locations will be capable of supporting broadband and voice services.
