

Demonstrated Experience: Templeton Telephone Company

Templeton Telephone Company dba Templeton Telecom has been serving the Templeton Exchange service territory since 1906. Templeton Telephone began installing fiber optic lines in 1991 and have continually upgraded our plant and equipment to provide the best services available to our customers. Our service territory is all fiber to the home/premise giving our customers a secure network lasting well into the future. Management, staff and board have been initiating and overseeing projects since 1984. We have partnered with other local telecommunications companies on networking equipment and currently provide switching services to a neighboring municipality.

Templeton Telephone has also been a strong partner in economic development. A business Revolving Loan Fund was established in 1996 and continues to be an excellent resource for new and existing business. Templeton Telephone Company was the second phone company in the State of Iowa to establish a USDA Revolving Loan Fund.
