

### WTC Experience

WTC has been in business since 1901. Our current ownership purchased the company in 1952. Since 1952 WTC has been a pioneer in providing buried private line services. We also lead the way moving from electro-mechanical to digital then to soft switching.

We have completed some fiber build to an industrial area that helped companies take advantage of higher end broadband and connecting them to their national or state wide infrastructure to better manage their businesses.
