Dear OCIO Review Committee:

The Page County Board of Supervisors writes this letter of support with enthusiasm for the grant application by FMTC to build fiber in our area.

As we have all learned, great internet is required for so much of our lives. Unfortunately the service we now have isn't adequate to support the current or future needs of area residents.

This FMTC fiber project is critically needed. Our current state of connectivity prevents us from offering solutions to individuals and businesses wanting to make forever homes in our communities. While we understand there is a tremendous amount of competition for these grant dollars, FMTC has a long history of investing in our communities and of being an excellent partner in past technological advances.

Thank you for your consideration in this matter. It is our hope that you will find them deserving of your approval for this application.

Sincerely,

Chuck Morris—Chair
Page County Board of Supervisors

TAYLOR COUNTY BOARD OF SUPERVISORS

Dear OCIO Review Committee:

I write this letter of support with enthusiasm for the grant application by FMTC to build fiber in my area.

As we have all learned, great Internet is required for so much of our lives, and unfortunately, the service we currently have is horrendous.

This FMTC fiber project would literally change our area's connectivity so much for the better we may hardly know how to act with such a resource at our disposal.

Thank you for your consideration of their application. It is my hope you will grant them (and us all) the approval being sought.

Sincerely,

A handwritten signature in cursive script that reads "Pamela Wilmarth".

Pamela Wilmarth, Taylor County Board of Supervisor
