**Re: Empower Rural Iowa Emergency Broadband Expansion Program (NOFA #006)
Application 418288 - Cedar County 5G Broadband Expansion**

We have conducted a thorough review of the coverage generated by our proposed project, and are confident that the households claimed will have access to this expanded broadband access. UScellular uses conservative methodologies when determining the link budget for the coverage area of our 100/20 Broadband experience. These methodologies determine the minimum areas and households in our coverage areas, and, as such, it is likely that considerably more areas and households will actually be within the coverage area.

A handwritten signature in black ink, appearing to read "Brian Elfers", with a stylized flourish at the end.
