Re: Professional Engineer Review for West Iowa Telephone Company  
2021 Iowa NOFA #006 Broadband Grant Application - Technical Review for  
Sioux Rapids FTTP Project

I have reviewed the West Iowa Telephone Company project approach, design, maps, equipment plans, and other related technical documents for this 2021 Iowa Broadband Grant Application.

The project as defined meets standard and well-engineered criteria for a project of this type and the active optical network design will far exceed the Iowa requirements for this application with capability of 1G/1G or greater speeds.

Best regards,
