

Miles Communications LLC and its parent company, Miles Cooperative Telephone Association, share the same employees that have completed over 90 miles of fiber to the home in the Miles Cooperative Telephone Association's ILEC area in the past 9 years. Our company and employees are experienced in installing, troubleshooting, and maintaining a fiber optic network. We have experience in broadband, VOIP, and IPTV services that will be offered in the new service area. Miles Communications LLC has local construction crews with over 15 years of experience to help with the construction of the fiber optic network project. Miles Communications LLC has also partnered with Solarus to better support our customers with a 24 hour a day technical support service. We have a decade of experience in constructing, maintaining, and expanding a fiber optic network.
