Demonstrated Experience:

Sully Telephone Association was incorporated in 1904. We have over 13 years of experience in construction of central office fiber-optic equipment and fiber-optic outside-plant communications. Eight years deploying active ethernet and GPON dedicated Fiber-to-the-Home (FTTH) Technologies.

Sully Telephone provisions, maintains and provides service to over 1100 Fiber-to-the-Home customer lines in four rural telecommunication exchanges. We have eight construction seasons of experience from 2014 to 2021 with FTTH central office equipment, outside-plant construction, fiber splicing and customer cutover work.

We continue to expand our FTTH footprint each year as financially possible in order to reach other underserved rural areas of the great state of Iowa! Sully Telephone can provide up to Gigabit symmetrical Broadband service to 100 percent of its customers!

Sully Telephone continues to resolve all customer trouble reports within 24 hours and provide customer service requests within two days.
