Re: OCIO Broadband Grant Program

Dear

Scranton Telephone Company is proud to be part of the OCIO Broadband Grant Program. We have been in the communication service for 52 years, starting out providing phone service to the community of Scranton, and the rural area. Scranton Telephone Company provided DSL to the customers in the community for 6 years before we went to providing internet over fiber.

Scranton Telephone Company has supported the community by donating to local organizations, like the Little League, 4H, and others. We also help the businesses in our community with their broadband needs.

We have been all fiber to the home in Scranton, town and rural, for 9 years now. We provide Phone, Internet and IPTV, to our customers. We use calix, and innovative for our providers. We get our signal for our IPTV from Aureon. Scranton Telephone Company is part of the Quad County ring, that provides our broadband to our customers.

Sincerely,

Allen Jacob, Manager  
Scranton Telephone Company
