

## Cumberland Telephone Company

Cumberland Telephone Company has done three towns as far as FTTH. The first, our exchange Cumberland, was done back in 2016 and finished the project in 2017 using several companies including Huntel, La Point and Trunkey to finish the project in a timely manner.

The second project was Bridgewater, Fontanelle FTTH in the two towns. Started in 2018 and finished in 2019 with the help of the same companies Huntel, La point, GBH, Turnkey. We have Active Ethernet in the Fontanelle community and GPON in the city limits of Bridgewater. We have left points to continue on the outer lying areas or both Fontanelle and Bridgewater to supplement our future endeavor.

We have a subscriber count of around 425 and liking to expand in the outer area of Adair County. We have a bore rig and lawn plow on order for the spring to help with our customers' needs as an as needed basis as we grow and our internet becomes a necessity to those in the area. We have personnel that are willing and capable from splicing to finishing the provisioning for our future and look forward to what is in store for us.
