Jessica,

You are correct, the block ending in 5076 is the correct block but was inadvertently replaced by block ending in 4095. Please advise if you want me to make the change in the Core Application

Peter

Hi Matt,

Some of these addresses are in a block that is not in your application. Did you mean to include block 190119603005076 (homecoming court, Viking Dr)?

Did you not mean to include the block ending in 4095, we did not find any addresses in this block?

See the image below. Please let us know what the project scope should be.

Thank you for the assistance.

Hi Curtis, Matt, and Peter,

Please have the appropriate POC register in the system. I will link them to the application from there. If an award is made, we would send it to the POC... which isn't Curtis.

Thank you,

Jessica,

I have copied Peter Rasmussen with FARR Technologies on this email, along with Matt Storm at VMCU. I was not involved in their application but they used my portal to submit it, so question.

Curtis,

It appears the blocks identified in your application do not have any homes constructed. Can you provide a few addresses so that we can confirm that the blocks are correct and that th

If the homes will be there at the end of the period of performance of the project, please let me know.
