Demonstrated Experience

Router12 Networks is in its 8th year of providing excellent broadband service and support to residents and businesses of Iowa. We've repeatedly "went the extra mile" to get reliable quality Internet access to both urban and extremely rural subscribers, including areas that other providers claimed were too expensive to provide service to. Owner Ryan Malek has been in the Internet Service Provider industry for over 20 years and strives to bring the best service possible to subscribers while keeping pricing competitive. With over a dozen providers in our service area to compete with, we've repeatedly proven that we are a top tier provider that's more than capable of providing a reliable high speed connection to the Internet.
