

To Whom It May Concern:

I am writing to express my enthusiastic support for Prairieburg Telephone's proposed pricing for the rural area around Monticello in Eastern Iowa. Their proposed project and affordable pricing will greatly benefit the communities and address the pressing need for reliable and high-speed internet connectivity.

The proposed pricing structure put forth by Prairieburg Telephone reflects a commendable commitment to making high-speed internet services accessible to a wide range of individuals and families within our community. In today's digital age, internet connectivity is no longer a luxury but a necessity, enabling us to access educational resources, conduct business, connect with loved ones, and stay informed about local and global events.

Affordable broadband pricing will undoubtedly contribute to the educational advancement of our students, the growth of local businesses, and the overall quality of life for all residents. It will empower our community members to fully participate in the digital economy and bridge the digital divide that can often hinder progress.

I urge you to give careful consideration to the application and to provide Prairieburg the necessary support and realize their vision of a digitally connected rural Iowa. By investing in companies like Prairieburg, we can bridge the digital divide, foster economic growth, and improve the overall well-being of our rural communities.

Respectfully,
