### Demonstrated Experience – NOFA #0008

Dumont Telephone Company has been an established service provider for 121 years (since 1902) and a Fiber-To-The-Home expert since 2006. We have built four communities and rural areas using both Active and GPON Fiber-to-The-Home technology with Adtran equipment, (a very experienced and established equipment vendor) to provide Voice, Video and Broadband services. More recently, the NOFA 0007 opportunity is currently allowing us to extend our network to four more communities. Our staff is well-trained and has a combined 140 years of work experience at this company. Dumont Telephone Company was a successful recipient of both NOFA 0003 and NOFA 0007. NOFA 0003 was completed before the required deadline. We are very familiar with fiber technology and these types of projects and this is just a simple extension of our existing Broadband fiber network.
