

Broadband Map v5 Community and Provider Challenge Form

The Office of the Chief Information Officer ("OCIO" or "Office") recently published the Statewide Broadband Availability Map version 5 ("Map v5"). Map v5 is designed to facilitate decisions concerning future spending under federally-funded broadband programs. Because Map v5 does not use the tiered structure envisioned by Iowa Code chapter 8B and because future federally-funded grant opportunities made available by the Office in accordance with Map v5 will not conform to Iowa Code chapter 8B, the map challenge process envisioned under Iowa Code section 8B.10 does not apply. However, the Office is making available a challenge process to allow public input into whether the map accurately reflects broadband coverage as of the publication date of Map v5 (the "As Of" date of Map v5).

The Office utilizes maps and data sources made available by the Federal Communications Commission (FCC) and/or developed or produced by contractors or third parties retained or utilized by the Office. These maps and corresponding data sources represent the status of Broadband in Iowa on the As Of date as reported by Communication Service Providers in Iowa. Unlike prior broadband coverage maps, Map v5 identifies broadband coverage by individual locations, making Map v5 far more granular than prior maps that displayed eligibility at the census block level.

Challenges to Map v5 will be based on presence or reliability of service and/or speed. Challengers will be required to provide for every location challenged an address and corresponding IA Location ID, to the extent a Location ID is available on the map. Challenges without this information may not be evaluated.

Every location on Map v5 reflects a status of 'likely eligible' or 'likely ineligible.' This status is based solely on speed and technology type. The eligibility of any particular location is contingent on the requirements associated with the federal funding being used to fund future Notices of Funding Availability ("NOFAs"). Eligibility determinations are subject to change over time. In addition, eligibility designations in no way guarantee facilitation of service in the future through state- or federally-funded broadband builds.

On August 2, 2022, the Office posted the final version of Broadband Availability Map v5 and opened a 30-calendar-day challenge window wherein anyone aggrieved or adversely affected by mapping determinations may challenge the Office's final determination of whether service at a particular location is accurately reflected.

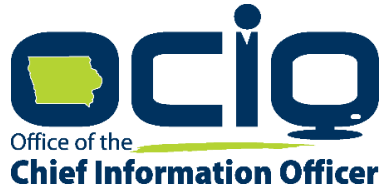

This form is for PROVIDERS and COMMUNITIES only. Resident challengers should fill out the form via the Map on the website.

You must check next to each row that you have read and understood the terms of the challenge process. Without this acknowledgment, the appeal will not be evaluated.

Use the tab titled "Challenge Form" to challenge any particular location. If you would like to report an address not presenting on the map, please use the tab titled "Location Not Present on Map." You can also use this tab to report when the location is not presenting at the correct area.

Challenger acknowledges the following (click checkbox to acknowledge):

<p>The information on the Map may be challenged for conditions existing as of August 2, 2022 (the "As Of" date). Challenges based on changes occurring to broadband service after the As Of date will not be considered.</p>		
<p>When submitting a challenge, evidence must be submitted for every location challenged in support of changing the likely eligible or likely ineligible status. Documentation that is speculative, generalized, or vague will not be sufficient. You may use the Sworn Statement/Survey template provided. Supporting documentation must be provided in one pdf. Reference to the page number of the supporting evidence within the pdf must be noted in Challenge Form. Challenged locations without a referenced page will not be evaluated.</p>		
<p>The Office reserves the right to reject challenges for a variety of reasons, including but not limited to:</p> <ul style="list-style-type: none"> >> Challenges claiming buildout at a future date; >> Challenges received reflecting incomplete information, including lacking IA Location ID; >> Challenges to a provider's service that are submitted without supporting evidence; >> Multiple challenge forms submitted by a provider or a community; >> Challenges received after September 1, 2022; >> Challenges received without all checkboxes marked indicating acknowledgement of the terms. 		
<p>The Office will notify affected parties by posting to the website any notice of challenge received. Final agency decisions shall become final unless within 30 days of the posting of a final decision, a challenger or person or party aggrieved or adversely affected requests a contested case proceeding pursuant to Iowa Administrative Code chapter 129-6.</p>		

Broadband Map V5 Provider/Community Challenge Form

A. CHALLENGER INFORMATION

Entity/Community Name	City of Dubuque, IA
FRN (Provider Only)	
Address	50 West 13th Street
City	Dubuque
State	IA
Zip	52001

B. DESIGNATED CONTACT INFORMATION

Contact Name	Christine Kohlmann
Contact Phone Number	563-589-4281
Contact Email	ckohlman@cityofdubuque.org

C. EXPLANATION

To the extent you believe additional explanation is required to ensure that you are communicating full and accurate information, please provide narrative to further explain your challenge.

D. ATTESTATION

By signing and submitting this form, the authorized representative attests that to the best of the authorized representatives knowledge and belief, the information submitted through this challenge form is true and accurate, and the form is signed under the pains and penalties of perjury. By typing your name, you are affixing your signature to this form and attesting to the accuracy of the information submitted herein.

City of Dubuque Iowa OCIO Challenge Map Narrative

Introduction

Thank you for the opportunity to respond to the data presented in the Office of the Chief Information Officer Broadband Map v5 and Federal Program Eligibility Determinants. In 2021, the City of Dubuque submitted a grant proposal under the National Telecommunications and Information Administration's (NTIA) Broadband Infrastructure Program, authorized by the Consolidated Appropriations Act, 2021, Division N, Title IX, Section 905, Public Law 116-260, 134 Stat. 1182 (Dec. 27, 2020) (Act) application. The grant submittal covered a project area including 286 census blocks within 4 different Census Tracts, including total households of 5,523 and a total population of 12,700 people.

The area evaluated for the challenge to the state of Iowa Broadband eligibility covers those same households as the NTIA grant application. The City of Dubuque continues to contend that the households within this project area constitute broadband "underserved" households. The challenge is based on what was learned in the analysis and findings of the 2021 grant proposal.

Although NTIA grant dollars were not awarded to the city of Dubuque, a review of the application with official from NTIA, indicated that Dubuque did indeed make it to the final round of review and was considered a "qualified" application. It was explained that Dubuque did not receive funding mainly due to the grant being oversubscribed for the funds that were available. Therefore, the analysis as well as response to challenges raised during the grant evaluation, give the city of Dubuque reason to continue to believe this project area represents a great number of underserved households and submits the following areas of challenges as provided on the forms' worksheets.

Challenge Form

During the NTIA grant evaluation process, existing service providers, specifically, Lumen Technologies (Lumen) and Mediacom, filed challenges during the grant evaluation to NTIA, claiming that qualifying broadband services are already available in 174 of 286 census blocks within the City's identified project area. (See Appendix 1 for a map of the proposed project area designating with different colors the 174 census blocks that have been challenged and the 112 census blocks that have not been challenged.)

In those census blocks that neither Lumen nor Mediacom challenged the classification as "underserved," infers that there is indeed "underserved" households. Each provider in effect is saying there is inconsistency in the maximum advertised download/upload of 1000/50 and truly available upload and download capacity. Addresses within those unchallenged census blocks have been offered as a challenge to the ability to offer 25/3 and thus are posed by the City of Dubuque as "underserved" based on this provider feedback..

In addition, NTIA defined “unserved ” for its Broadband Infrastructure Grant Program to mean broadband service with a download speed of not less than 25 Mbps, an upload speed of not less than 3 Mbps, with “underserved” defined as a download speed of not less than 100 Mbps, an upload speed of not less than 20 Mbps and latency sufficient to support real-time interactive applications. More specifically, NTIA stated that it interprets the standard to mean the ability to provide downstream and upstream simultaneously to every household in the eligible service area” A similar high-level NTIA service standard has been expressed as to latency. NTIA interprets its latency requirement “to mean [that] 95 percent or more of all peak period measurements of the network round trip latency . . . are at or below 100 milliseconds.”

In 2021 the City of Dubuque issued a community broadband survey to residents. It is evident from resident feedback that many households, businesses, and other locations within the proposed challenged addresses are unable to receive broadband services that measure up to the NTIA expressed standards for an acceptable or “qualifying broadband service” despite provider advertised maximum speeds. (Appendix 2 provides the results of a 2021 community broadband survey.)

The broadband issues in our community are the consequence of existing broadband infrastructure that is deficient relative to both the last mile and middle mile transport facilities used in serving the project area. The current infrastructure is out-of-sync with both the greater population densities and the collective broadband needs of the residents within that area of Dubuque. These conclusions are supported by various informational sources, including not only information gleaned from FCC and NTIA broadband mapping resources and from an on-line community broadband survey, but also from extensive community engagement activities undertaken as part of the City’s work to address and reduce poverty’s negative effects throughout the Dubuque Community.

With respect to the proposed project area challenges presented by Lumen and Mediacom, the City has no information at this time as to what specific source data each of these companies is relying upon in presenting their claims that broadband services meet the NTIA standards and are being provided in the challenged project area. Lumen and Mediacom as the entities presenting should bear the burden of proving up their claims, and if the challenges presented rest only on currently available FCC “Form 477” data, or a blanket DOCSIS standard of capability, they should be viewed as grossly deficient and promptly rejected.

The FCC’s broadband mapping data is based on advertised broadband speeds and entire census blocks are considered served with the advertised broadband service if only one location within a census receives that service. Although efforts are being made through this latest round of mapping challenges for the state of Iowa, it seems that census block level data has been applied across all addresses.

The City of Dubuque disputes the accuracy of the data for Maximum available provided on the maps and believes the provided addresses are underserved by what many residents within this area are in fact experiencing relative to the performance of their existing broadband services.

Locations Not Present on Map

The design of the City's NTIA grant submittal determined the total number of addresses within the project area of 4,678, with a business address count of 493, residential address count of 4185, and "unique" addresses of 3230 (referring to street addresses associated with within a separate building or structure). Addresses were verified against the City's GIS. Addresses identified within the same project area on the state of Iowa map numbered 3111. After analysis of "real" addresses where an individual, or business could receive broadband services against GIS and grant design documents, the difference number is roughly 630 locations shown on the locations not present on the map.

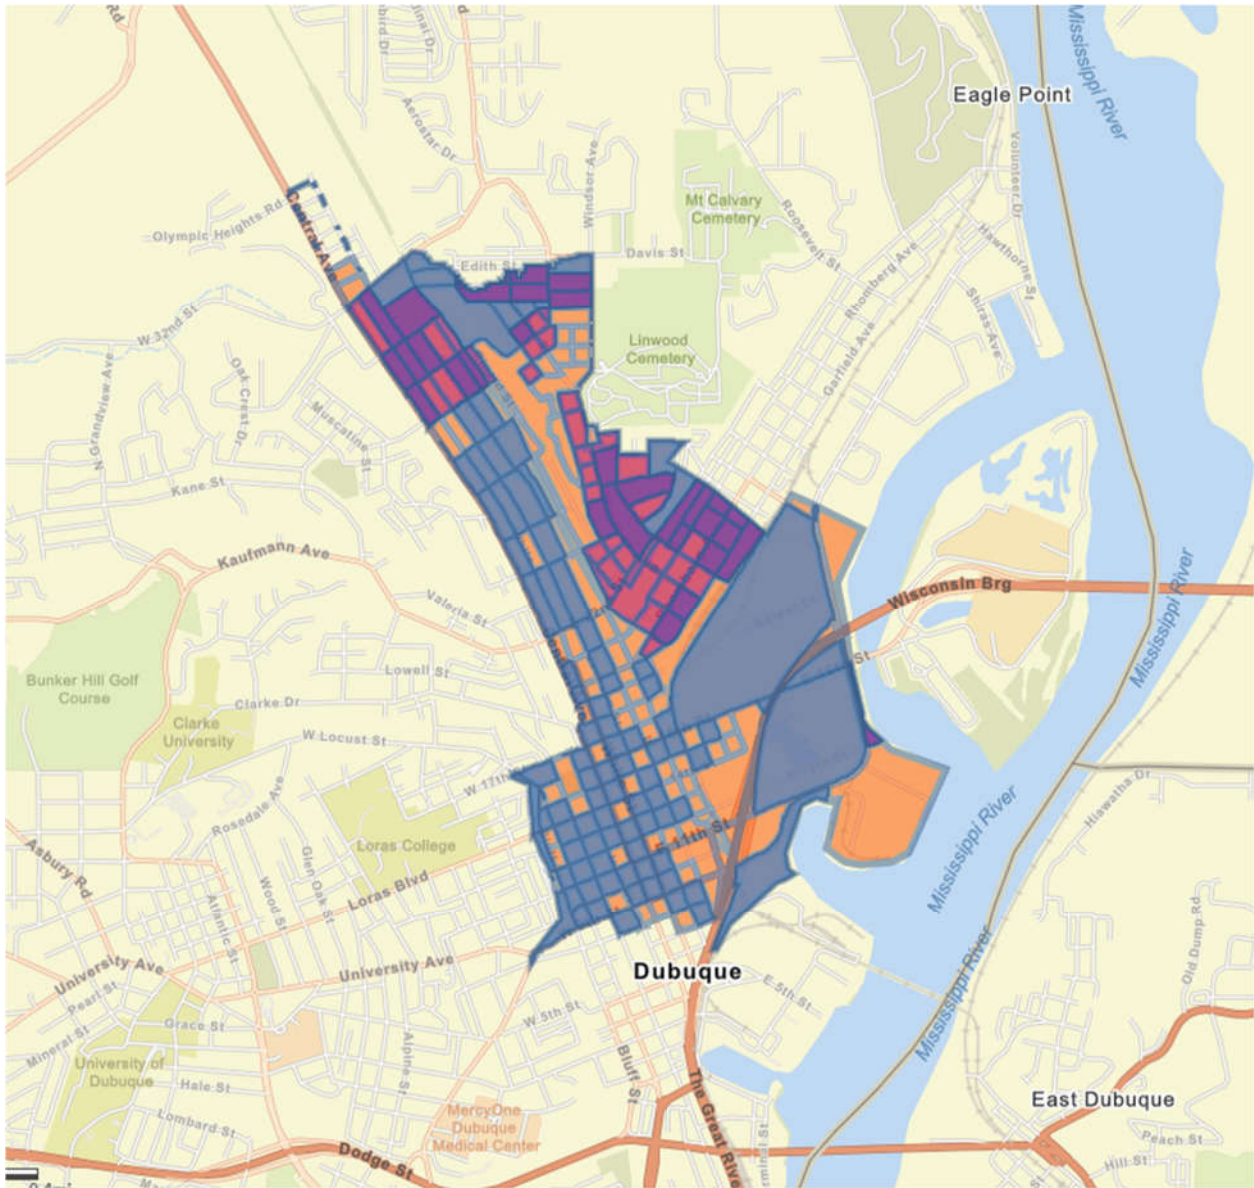

Survey Information

It is evident that many households, businesses, and other locations within the proposed project area are unable to receive broadband services that measure up to the NTIA expressed standards for an acceptable or "qualifying broadband service." This is the consequence of existing broadband infrastructure that is deficient relative to both the last mile and middle mile transport facilities used in serving the project area. The current infrastructure is out-of-sync with both the greater population densities and the collective broadband needs of the residents within that area of Dubuque. These conclusions are supported by various informational sources, including not only information gleaned from FCC and NTIA broadband mapping resources and from an on-line community broadband survey, but also from extensive community engagement activities undertaken as part of the City's work to address and reduce poverty's negative effects throughout the Dubuque Community. The survey data is provided for review.

Conclusion

We are supportive of the state of Iowa's initiatives to determine eligibility for funding that will allow the citizens of Dubuque to gain access to the high-speed broadband services they desperately need. A webapp has been created showing data behind the assertions put forward in this challenge. It can be found at <https://arcg.is/nXGnT0> Please don't hesitate to let us know how we can be of further assistance in your review.

Mediacom is too expensive and 'Comelec' is practically non-existent and is not a viable 2nd option. I contacted Comelec and was told they "weren't providing service in my area". I live in Dubuque and can't use them? Besides, Comelec basically charges the same as Mediacom---100/month for their top tier service isn't a good deal at all...The only other option I know of after this is satellite/dish or "Windstream" and both of these deliver sketchy, unreliable, slow, internet. This option might be cheaper, but it's not trustworthy and stable enough to work from home with. Please help! This has been an issue for YEARS and everyone knows it. We need a viable alternative, otherwise we'll be paying \$150+ JUST for high speed internet. Our bill is already over \$90 just for high speed internet alone and it's going up.		100 mbps download, 2 simultaneous devices	Yes it was requested and was told it wasn't available	-90.66889	42.50508511

170	618afc7b-8ae0-42fd-85cb	6/13/2021 13:31	Comelec	Verizon	13.00	234.00	229.00	Your first question should have been "working or retired". That would explain why I had to leave the first 6 questions answered as "No Impact". Another area is the question regarding the landline. We have a landline phone but it uses a service called Ooma. That system uses the wifi home system to communicate to the world. So it is a land line but not using a landline and only costs about \$17.00 per month. Great system. The other switch we've made is to have the car wifi system turned on. That plus the home wifi have allowed us to reduce the data plan for the cell phone down to the absolute minimum. Everything in this house that needs to runs through the router, phones, tvs, computers, printers, weather station, and maybe one or two other things that I can't think of right now. Not bad for a couple that are 81 and soon to be 80.	dach@yousq.net	250 Mbps	I have never requested improved services	-90.73699236	42.50696201

								Internet goes out regularly -- average of 4-6 times a day. At our previous residence in Dubuque, we had Comelec fiber internet and were very happy with it. We were unable to bring Comelec to our new home because it wasn't available in our neighborhood, but we would happily go back to it if and when it becomes available.					
								We are not fans of Mediacom, but have no other choice right now. Very slow, often buffers when we're streaming, service is often disrupted (as a remote worker for a lot of the past year, this was very frustrating).

223	ba241e0a-5873-4c87-812	6/17/2021 0:37	Mediacom	Verizon	31.00	-	-	We lose our internet service completely at least 4-5 times per day. Sometimes the internet is 'down' for over an hour or more. Often it is down for a few minutes. Our monthly rates have gone up (without clear notice) since January 2021--at least 30 dollars per month, yet we experience many outages and do not have consistent service. No refunds have been offered. It's difficult to get hold of anyone at the company to assist. The company is Mediacom. We have been told by that company that service is not as good "down here" because cable is so old. Is anyone repairing it? I feel there is a sense that this downtown neighborhood is not as 'worthy' as other neighborhoods to get good service or good repair of old cable. Oldest should be repaired first, right? Is this an attitude about mixed race neighborhoods, about average income, about people who rent and not own their homes? If the service is not consistent, either fix it or lower our rates. No bias, please. Dependability, quality, reasonable cost and speed are important features	struckkathryn@gmail.com		Yes it was requested and was told it wasn't available	-90.66954798	42.50829301

241	b507df69-dc34-4887-897f	6/20/2021 22:37	Mediacom	Verizon	27.00	1.57	2.16	It's been taking several minutes for videos to load on our streaming services. There have also been a few instance where I've been on a virtual conference calls with colleagues and my computer will say my internet is unstable. This happens at least a few times a month. I've lost connection several times and had to log in again. I've tried calling, but it always takes awhile to get ahold of anyone. When I do get ahold of someone I'm told there are no outages in my area. They do try to help walk me through what I need to do to fix it, but internet issues haven't stopped. We're just dealing with it because we're already paying over \$100 for our internet package and can afford to pay more for faster onternet.	vanessaarnold13@gmail.com	Internet 100 Mbps Download and 10 Mbps Upload	I have never requested improved services	-90.66889	42.50508511
