Cedar Falls Utilities provides communication services, via a mix of fiber and fixed wireless solutions, for our rural electric territory that is roughly 90 square miles that extends west from Cedar Falls to near Dike, then north to the New Hartford area, east to south of Janesville and back to NW Cedar Falls. A large percentage of this area is reported as non-TSA per the recent Broadband Grant. To a large extent this is a result of BTWI reporting 100/50 service in a good share of this area. We recently surveyed our rural customers and did not find ANY reports of this provider serving anyone in this area, none-the-less providing 100/50 service as stated on the map eliminating these areas from funding. Nor do other wireless companies provide service above a Tier 2 service in these areas according to our survey results. We question the ability for BTWI to provide the service and the speeds listed on the map. They do not have a 100 mbps option on their website for residential customers which is inconsistent with their claims and doesn't meet the requirements to provide the service to the customers in those census blocks.
