To the extent necessary, please feel free to upload additional explanations/supporting documentation.

This "route" project is part of a 2-year plan to bring much needed fiber speeds to rural Iowa. This route goes from our current service area through the town of Walker and to 2 subdivisions south of Walker and to other homes NW nearby. The plan is to deploy fiber and serve only those HSBs directly along the route in 2022, and subsequently in 2023 deploy fiber in the remainder of Walker. So this challenge has census blocks that will be challenged for this project as HSBs are along the direct path, AND also in the Walker "Town" challenge for the remainder of the census block(s), including ones along this route where only one side of a census block will be served, that will be built out in 2023. The speeds indicated on the map are vastly overstated via conversations with Walker residents including the city clerk, and we have emails stating such that will be included with our grant application. These can be provided for the challenge process if needed. Other residents in the subdivisions and along the route also report speeds of 4 Mbps - 30 Mbps while paying for 100/100 speed packages. They are not happy and in dire need of faster speeds because they're not getting the speeds indicated by the v4 map.

E. SIGNATURE* By typing your full name you are affixing your signature to this form and attesting to the accuracy of the information submitted herein.
