**D. ADDITIONAL EXPLANATION** (To the extent you believe additional explanation is required to ensure that you are communicating full and accurate information, please use the below space to further explain, qualify, or substantiate your above certification/attestation/affirmation. To the extent necessary, please feel free to upload additional explanations/supporting documentation. If you are a Communications Service Provider and indicated "In Error" or "No Response" in the "Prior Reporting to FCC" column for any census blocks above, please elaborate.)

All 24 census blocks in the attached list were awarded to our company in round three of the Connect Every Iowan Broadband Grant Program, as part of the CARES Emergency Broadband Grant Program, under application number 367166. Per the plans detailed in our application, this area is currently in the process of being completely overbuilt with fiber, after which broadband speeds up to 1 Gbps will be available.

At the time the latest version of the broadband availability map was made available, the identified blocks correctly showed that 25/3 broadband was not available as of July 31, 2020; however, construction for this project has commenced, and this project will be 100% complete by or before the deadline date identified in NOFA #003, as specified in our application. Providing state funding for these blocks would be a duplication of the state funding which has already been awarded, with no additional benefit in terms of improved services, since we are already completely overbuilding the areas with fiber. As such, we request these census blocks be removed as funded TSA's from the broadband availability map, or not be awarded any funding during the application review process. If you require additional information, please let us know.
