Re: V5 State DSL Challenge

Dear Internet Consulting Services,

On August 2, 2022, the Iowa Office of the Chief Information Officer (OCIO) posted the final version of Broadband Availability Map v5 and opened a 30-calendar-day challenge window wherein anyone aggrieved or adversely affected by mapping determinations may challenge the Office's final determination of whether service at a particular address location is accurately reflected and/or whether an address location is geographically located on Map v5. The Office also reserved the right to challenge provider-reported data to the extent that any provider-reported data appeared faulty.

As part of the map challenge process, OCIO has filed a challenge to Internet Consulting Services's reported DSL service speeds. Inaccurate reporting may limit the State's opportunity to receive federal funds for future broadband grants. It is in the best interest of the State and the residents of Iowa to have an accurate broadband map so that the State will be in the best possible position to receive maximum funds for future grant rounds.

To this end, OCIO is requesting additional information regarding the service speeds delivered at the address locations listed in the Notice Form. The Notice Form must be received by this Office no later than **October 24, 2022 at 5:00 CDT**. It is the understanding of the OCIO that DSL as a broadband internet technology has a number of limitations, especially with regard to serving rural locations that may be some distance from a provider's central office or other hub distribution point. The address locations indicated in the Notice Form indicate download and upload speeds in excess of the traditional DSL capabilities. These speeds are as reported by your organization.

In the Notice Form, please address the following:

1. Define what method you are using to reach speeds higher than typically available through DSL as described in the map data:

a. Do you deploy remote DSLAMs with fiber feeds? If not, what is the average distance from a customer to the DSLAM on copper?
b. Do you bond copper pairs?
c. How are you overcoming the distance limitations in your vendor's DSL technology?

2. Provide the formula or calculation used to calculate the provided speed.

3. Indicate the technology type at the address location. If the technology type is in fact DSL, indicate which **type of DSL** you are providing.

4. Confirm that the speeds indicated on Broadband Map v5 for said locations are correct, and that Internet Consulting Services can facilitate speeds consistent with the map data for that location using the specified DSL technology type indicated in the Notice Form. In the alternative, enter the actual download and upload speeds able to be facilitated at that address location.

OCIO must receive your response no later than **October 24, 2022 at 5:00 CDT**. Please let us know if you have any questions or require additional information to respond to this request.

Regards,

Office of the Chief Information Officer
State of Iowa

State Challenge Notice re DSL

EXHIBIT A
Affirmation of Service Speeds Address Locations
Broadband Availability Map Challenge Process Version 5

A. RESPONDENT INFORMATION

Company Name	Internet Consulting Services LLC
Address	235 Alexander Ave.
City	Ames
State	IA
Zip	50010

B. DESIGNATED CONTACT INFORMATION

Contact Name	Matt Bueltel
Contact Phone Number	515-232-4453
Contact Email	mbueltel@ics-llc.net, fcc@ics-llc.net

C. EXPLANATION

C.1 Define what method you are using to reach speeds higher than typically available through DSL as described in the map data:

a. Do you deploy remote DSLAMs with fiber feeds? If not, what is the average distance from a customer to the DSLAM on copper?	We no longer deploy DSL technology and have switched our entire portfolio to Fiber w/ Ethernet to the unit
b. Do you bond copper pairs?	No
c. How are you overcoming the distance limitations in your vendor's DSL technology?	We no longer deploy DSL technology and have switched our entire portfolio to Fiber w/ Ethernet to the unit

C.2 Provide the formula or calculation used to calculate the provided speed.

N/A

D. AFFIRMATION

By signing and submitting this form, the authorized representative attests that to the best of the authorized representatives knowledge and belief, the information submitted through this challenge form is true and accurate, and the form is signed under the pains and penalties of perjury. By typing your name, you are affixing your signature to this form and attesting to the accuracy of the information submitted herein.
