What:

OCIO has established an enterprise contract for the Siteimprove service based on GSA pricing. Siteimprove provides web governance services to help manage and maintain websites through quality assurance, accessibility analysis, and Search Engine Optimization. Scan your website to find broken links and misspelled words and identify Section 508 compliance issues with the website and attached PDF documents (NOTE: There is a separate charge to have PDF documents scanned).

Why:

It should be easy for citizens to find information on State websites and information should be accessible to everyone!

Citizen Impact:

People trust a well designed and easy to use website. Citizens will have a better impression of your Agency.

Agency Impact:

A website governance tool will save staff time finding broken links and keeping the agency website current.

Our mission at the OCIO is to provide technology solutions that are secure, efficient, effective and provide access for citizens and employees to state services anywhere and anytime.
